BMR12B75™

Mycogen
SEEDS

Mycogen Brand BMR hybrids are bred specifically for silage end-users that delivers digestibility and tonnage focused on milk production

- Tall plant stature with excellent eye appeal.
- Excellent neutral detergent fiber digestibility with good starch scores.
- Excellent ear development and tip fill.
- Excellent companion to F2F627 and BMR14B96 genetics.

YIELD ENVIRONMENTS

- ★ Highly Productive
- ✓ Moderate
- ⊕ Low

PLANTING

- ✓ Early Planting
- ✓ Late Planting

POPULATION

SOIL ADAPTABILITY

- ⊕ Poorly Drained Soils
- ✓ Sandy Soils
- ⊕ Clay Soils

CROP ROTATION

- ✓ Continuous Corn
- ★ Corn / Soybean

FUNGICIDE RESPONSE

AGRONOMICS

- ★ Stalks
- ✓ Roots
- ⊕ Green Snap
- ✓ Drought Tolerance
- NA High pH Soil Tolerance

DISEASE TOLERANCE

- ⊕ Gray Leaf Spot
- ⊕ NCLB
- ⊕ Goss's Wilt
- NA Anthracnose Stalk Rot
- NA Fusarium Ear Rot
- NA Diplodia Ear Rot
- NA Giberella Ear Rot
- NA *SCLB

CHARACTERISTICS

GDUs to Mid-Silk..... 0
Plant Height..... Tall
Ear Flex..... Semi-Flex
Cob Color..... Red

SILAGE QUALITY

- ★ Fiber Digestibility
- ✓ Starch Content
- ✓ Starch Digestibility

HARVEST RECOMMENDATION

Moisture Content..... 66% - 70%
Chop Length..... 1" - 1.5"

It is recommended that all hybrids are kernel processed. If not available, reduce chop length. Consult your local Mycogen Seeds representative or visit mycogen.com/silageharvest for more information.

- ★ Highly Suitable - Key Strength
- ✓ Suitable - Meets Standards
- ⊕ Manage Appropriately
- ✗ Strong Caution - Limitation
- NA Rating Not Available

HERBICIDE TOLERANCES

IMPORTANT: Characteristic scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by Mycogen Seeds.

Information and scores are assigned by Mycogen Seeds and are based on period-of-years testing through 2018 harvest and were the latest available at time of printing. Some scores may change after 2019 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.

Mycogen® Brand Corn Products Legal and Trademarking Statements

®™ Trademarks of Dow AgroSciences, DuPont or Pioneer and their affiliated companies or respective owners.

Optimum® AcreMax® (AM) insect protection

Optimum® AcreMax® Insect Protection system with YGCB, HX1, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax products.

Optimum® AcreMax® Xtra (AMX) insect protection

Optimum® AcreMax® Xtra Insect Protection system with YGCB, HXX, LL, RR2. Contains a single-bag integrated refuge solution for above- and below-ground insects. In EPA designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax Xtra products.

Optimum® AcreMax® Xtreme (AMXT) insect protection

Contains a single-bag integrated refuge solution for above- and below-ground insects. The major component contains the Agrisure® RW trait, the YieldGard® Corn Borer gene, and the Herculex® XTRA genes. In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax XTreme products.

Optimum® AcreMax® Leptra® insect protection

Optimum® AcreMax® Leptra® products with AVBL, YGCB, HX1, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax Leptra products.

Qrome® products are approved for cultivation in the U.S. and Canada. They have also received approval in a number of importing countries, most recently China. For additional information about the status of regulatory authorizations, visit <http://www.biotradestatus.com>.

*In cotton growing regions, a separate 20 percent structured refuge is still required for Refuge Advanced.

Herculex® Insect Protection technology by Dow AgroSciences and Pioneer Hi-Bred. PowerCore and SmartStax® multi-event technologies developed by Dow AgroSciences and Monsanto. ®™PowerCore, Roundup Ready, Roundup Ready Logo, SmartStax, SmartStax Logo, YieldGard and the YieldGard Corn Borer Design are registered trademarks of Monsanto Technology LLC. Agrisure® and Agrisure Viptera® are trademarks of, and used under license from, a Syngenta Group Company. Agrisure® technology incorporated into these seeds is commercialized under a license from Syngenta Crop Protection AG. Liberty®, LibertyLink® and the Water Droplet Design are trademarks of Bayer. **Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. B.t. products may not yet be registered in all states. Check with your local seed representative for registration status in your state. Enlist Duo and Enlist One™ herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One herbicides are the only 2,4-D products authorized for use in Enlist crops. Always read and follow label directions. Visit Enlist.com/EnlistAhead for best management practices or more information.**
